DETAILED ACTION

Drawings

1. The informal drawings filed in this application are acceptable for examination purposes. When the application is allowed, applicant will be required to submit new formal drawings.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "and/or" in the first line of claim 1 makes claim 1 vague and indefinite since the scope of the claim is not defined.

Claim 4 recites the limitations "the mouse" and "the mouse icon". There are insufficient antecedent basis for these limitations in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Crim (USP 5920866).

Regarding claim 1, Crim teaches a system for enabling entry and display data in a database (col 1, lines 7-10), the system comprising a processor 1216 for controlling the display of a form (Fig. 5F) having a number of data fields (304, 306, 308, corresponding to data items stored or to be stored on a database, and a store 1220 and 1222 for storing , for at least one data field, information enabling attributes 513 relating to that data field to be displayed upon user command while the form continues to be displayed (col 9, lines 33-42).

Regarding claim 2, Crim teaches that the stored information defines one or more data items from the database (col 9, lines 27-29).

Regarding claim 3, Crim teaches the providing a user interface 500 to enable a user to define information which is stored in the store corresponding to the at least one data field (Fig. 5A-5C).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Crim and Johnson (USP 5721847).

Regarding claim 4, Crim does not teach that the user command is a right click of the mouse. However, such feature is known in the art as taught by Johnson. Johnson teaches a method for inserting a selected graphic control within a spreadsheet which comprising the opening a drop-down menu upon user's right-mouse click (col 7, lines 23-27). It would have been obvious to one of ordinary skill in the art, having the teaching of Crim and Johnson before him at the time the invention was made, to modify the interface system taught by Crim to include the opening a drop-down menu upon user's right-mouse click taught by Johnson with the motivation being to enable the user to easily and conveniently accessing data in the value list.

8. The prior art made of record on form PTO-892 and not relied upon is considered pertinent to applicant's disclosure. Applicant is required under 37 C.F.R. § 1.111(c) to consider these references fully when responding to this action. The documents cited therein teach about creating and modifying data in entry forms which relate to the claimed invention.
